Vishruth VS

+91 821 763 4720 | vishruthvs2003@gmail.com | github.com/VishruthVS | linkedin.com/in/vishruthvs

Results-driven Software Engineer with 1.5+ years of experience in DevOps and backend development, seeking full-time opportunities—onsite or remote—in core product development. Proficient in Java development, CI/CD automation, and managing performant infrastructure components. Skilled in Jenkins, Docker, Kubernetes, with hands-on experience in multi-threaded, concurrent systems. Adept at collaborating across QA, architecture, and product teams in Agile environments. Strong foundation in scripting, backend systems, REST APIs, and cloud-native microservices.

EDUCATION

JSS Science and Technology University, Mysuru,   JAN 2021-
BE (3rd year)in Computer Science and Technology | Karnataka, India

EXPERIENCE

Informatica, *Intern - IT Apps*   July 2024 -
- Developed and implemented a complete Jenkins workflow from scratch for automating builds and deployments, including staged deployment and automated log retrieval from AEM.
- Automated periodic data extraction from Okta and Adobe Analytics, integrating results into Power BI for real-time reporting, while orchestrating SOAP-based workflows with Salesforce Marketing Cloud Engagement (MCE) to retrieve and update license consumption metrics.
- Implemented OAuth 2.0 authentication flows for secure API integrations, enabling token-based access control across internal services
- Enhanced CI/CD pipeline efficiency by optimizing Maven build automation and remediating high-priority failures in legacy Jenkins jobs; additionally, integrated Uptrends for synthetic and uptime monitoring with custom alerting thresholds.

MediaJade, *Full Stack Developer* | Intern (India)   May 2024 - June 2024
- Served as a Full Stack Intern at MediaJade, focusing on deploying backend services onto AWS.
- Implemented and managed AWS Lambda functions and API Gateway to ensure efficient and scalable serverless architecture.
- Utilized AWS ECR Registry for container management and S3 buckets for secure and reliable data storage.

Trustauthx, *Frontend Developer* | Remote (India)   April 2023 - May 2023
- Led Figma UI/UX design and seamlessly translated them into captivating landing pages.
- Proficiently blended design and code to create engaging front-end experiences using React and Tailwind CSS.

SKILLS

Languages	Java , Python,TypeScript, C/C++,JavaScript, Git, Dart, Arduino (Arduino code)
Frameworks	React.js, Node.js, Next.js, Tailwind CSS Flutter, Vue.js, Prisma, PyTorch
Cloud Services/Platforms	Cloudflare, AWS (Amazon Web Services), Neon DB, Vercel
Database Systems & Tools	MySQL, PostgreSQL, SQL Server Management Studio(SSMS),Microsoft SQL Server, pyodbc,MongoDB
DevOps/Tools	Jenkins, Docker, Kubernetes, GitHub Actions, Maven, Uptrends

PROJECTS

Blog Platform *- Lead Developer*   March 2024 -April 2024
- Led the development of a Blog Platform allowing users to post their thoughts and share them with the world.
- Implemented the backend using TypeScript, Docker, and PostgreSQL, ensuring efficient data storage and management.
- Integrated Authentication as an NPM package for secure and reusable user login and access control.
- Utilized Docker for containerization and automated deployment using CI/CD pipelines, ensuring easy installation and scalability of the application.
- Employed Prisma for effective user pooling and database interaction.

AROGYA-HRUDAYA – *Lead Developer*   Sep 2023 - Dec 2023
- Developed a mobile application using Flutter to meet the unique needs of healthcare practitioners.
- Designed and implemented features such as quick appointment scheduling, medication advice, and notifications to remind users to take medications on time.
- Integrated Firebase to access and store data, ensuring seamless data management and synchronization across devices.
- Delivered an intuitive and efficient digital solution for doctors and medical staff, enhancing their productivity and patient care.
